

Work Clever. Click Together.

# L-BOXX<sup>®</sup>

Product Range

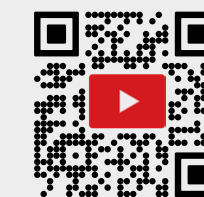

**THE PROBLEM**

**THE SOLUTION**

The craftsman works with a huge range of different machine cases, boxes, cartons and buckets. This means it can be difficult to monitor stock levels of consumables, transport is hard work, and every day lots of valuable time is lost during loading, unloading and securing cargo.

We have the solution: L-BOXX and ProClick – two mobility systems that are compatible with each other and guarantee fast and efficient work.

Through integration into the in-vehicle equipment systems of numerous well-known manufacturers, such as the market leader Sortimo, they can be stored safely and neatly in the vehicle.

The L-BOXX is much more than just a case – the universal mobility solution, with its numerous combination and expansion possibilities, is an intelligent transport and storage system.

The unbeatably simple and patented click mechanism of the various system products enables intuitive connecting, combining and separating in seconds, as well as clever transport and time-saving carrying in combination.

A well-thought-out range of accessories creates order and overview in the system. This way, nothing is forgotten that will later be needed on the construction site.

The modularly designed L-BOXX system offers everything that the professional craftsman needs for his daily work and that makes his work easier.

# L-BOXX®

Versatile combination  
**MIX AND MATCH**

The various BOXXes and system products work together perfectly like a well-oiled team. That's why a host of well-known manufacturers use the L-BOXX system as intelligent outer packaging for their products, providing their customers with real value added.

Because no matter what colour the L-BOXXes are, they are all compatible with each other!

Instead of a confusing collection of different carrying cases and storage containers, professionals can create a uniform and fully compatible system – for easy handling and maximum mobility.

Our mobility system  
THE HARD FACTS

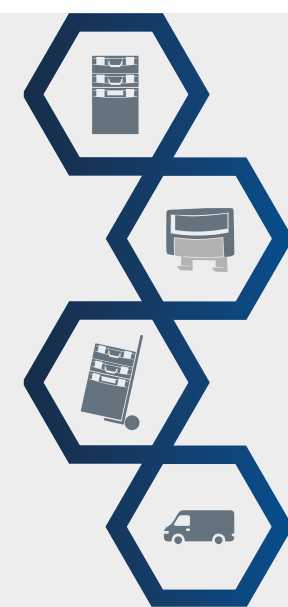

- The robust click mechanism and carrying handles permit L-BOXXes to be transported in bundles of up to 40 kg
- The lid can be loaded with up to 100 kg
- Each L-BOXX has a loading capacity of up to 25 kg
- Splash-proof
- Ergonomically shaped handles and additional side grips for flexible and convenient handling
- BOXXes are clicked together and separated with unbeatable ease

Thanks to its rugged design made from impact and shock-resistant ABS plastic, the L-BOXX can handle nearly every challenge and withstand even extreme loads. Making it ideally equipped for daily use on the construction site. Whether you need to transport heavy material, small parts, machines or tools, the L-BOXX brings everything to the place of use easily and conveniently.

The L-BOXX brand stands for more than just a toolbox available in four different sizes. It is the basis of a product family with a system concept.

We also follow this concept when designing the standardised accessories that let you individually adapt the BOXXes to suit your own needs.

Convenient transport in combination thanks to the patented click connection

Quick connection and disconnection of the BOXXes thanks to simple click mechanism

Power-saving and efficient transport to and from the construction site

Fully compatible with numerous manufacturers of vehicle equipment such as the market leader Sortimo

L-BOXX® 102

L-BOXX® 136

L-BOXX® 238

L-BOXX® 374

# ProClick

Always everything at hand  
THE PROCLICK SYSTEM

- Unique mobility system with guaranteed one-hand operation
- Robust and tear-resistant material
- Safe transport due to simple and intuitive click click connection
- Quick access to all tools and consumables and still have your hands free
- Flexible, clear and tidy storage
- More safety through reflective safety strips

# ProClick

Mobile working with a system  
CLICK AND GO

- Simple, reliable and flexible handling
- Individually combinable components
- High-quality and robust materials
- Compatible with the L-BOXX system
- Integration into the Sortimo in-vehicle equipment systems

ProClick is changing the way professional craftsmen carry their tools.

The ergonomically padded Tool Belt or simply your own trouser belt forms the basis – the ProClick holder is the heart and hub of the system. Unique: awkward threading and unthreading of the belt is a thing of the past thanks to ProClick. If necessary, the holder can be removed in no time at all or fastened to the belt with the clever quick-release system.

The various tool bags, flexible storage solutions and robust holders, which are equipped with a so-called ClickUnit, can be clicked into place and firmly connected to the holder with a single movement. So you always have everything at hand and still have your hands free.

The heart and hub of the system:  
the holder

Transport and storage of lithium-ion batteries and lithium-ion cells

# BATTERY SAFEBOXX

# SAFETY Rocks

# Optimally protected.

## The safety solution for lithium batteries

Whether cars, bicycles, power storage for renewable energies, power tools or electric gardening equipment - lithium batteries are being used more and more. The problem: Lithium batteries are considered dangerous goods and are therefore subject to the law on the transport of dangerous goods with strict criteria. The L-BOXX Battery SafeBOXX offers you the transport and packaging solution according to requirements.

The L-BOXX Battery SafeBOXX is the transport and storage solution for lithium batteries.

- L-BOXX 238 made of special plastic compound with BAM dangerous goods transport certification (UN 3480)
- Stackable & clickable for space-saving storage and easy transport in combination
- Cirrux brand insert fits snugly to the battery and secures it from bumps and unintentional slipping around during transport
- Cirrux marker insert made of non-combustible (according to DIN 4102) and non-conductive material. The permeable surface absorbs leaked electrolytes into the padding material and binds them there (absorption capacity 3.49 kg). Heat generated by uncontrolled chemical reactions inside the battery is absorbed. The upholstery material is dust-free.
- Legally prescribed identification labels are clearly visible on the lid
- Simple load securing in vehicle racking systems from numerous well-known manufacturers, such as those from the market leader Sortimo.
- System BOXX made of high-quality and impact-resistant ABS plastic and lid carrying handle for easy handling
- Lockable by rope or padlock (not included in scope of delivery)
- Dust and splash-proof
