

BS Systems Appoints New Managing Director

The Bosch and Sortimo joint venture enters its next phase of growth and innovation.

Effective July 1, 2026, Marc Philipp has been appointed Managing Director of BS Systems GmbH & Co. KG. An experienced executive from the Bosch Group, Philipp will focus on the strategic development of the L-BOXX System, accelerating innovation and driving the company's growth strategy forward.

Marc Philipp succeeds Fatih Yilmaz, who has led the company for the past 14 years, developing BS Systems from a start-up into a market leader in high-quality modular transport, storage and organization solutions for the construction and professional tool sectors.

Philipp brings more than 22 years of experience within the Bosch Group and extensive knowledge of the L-BOXX System and its products. During his career at Bosch Power Tools, he held various management positions in Germany and internationally across product management, marketing and sales. His extensive experience in developing

international product strategies, brand management and organizational development gives him a strong background in professional solutions for the trades.

In his new role, Philipp will be responsible for the strategic, organizational and operational development of BS Systems GmbH & Co. KG. Key priorities include further expanding the L-BOXX System and advancing intelligent transport, storage and organization solutions for trade professionals, industry and service providers.

"BS Systems has a strong brand, innovative products and a highly committed team. I look forward to working with our team, our shareholders Bosch and Sortimo, and our partners to further develop the L-BOXX System, unlock new applications and market opportunities, and continue the success story of the L-BOXX brand," said Marc Philipp.
